LICENSE AND CERTIFICATIONS

- Introduction to Oracle SQl by Udemy
- Kubernetes From 10,000 Feet by Codeku
- AI/ ML Engineering by SLIIT
- Getting Started with DevOps by AWS
- Introduction to Containerization: Docker by Codeku
- Google Cloud Fundamentals: Core Infrastructure by Google cloud training
- Postman API Fundamentals Student Expert
- Master DevOps: CI/CD, Automation & Monitoring Specialization by Cousera

Experience In

- GitHub
- Jira
- Playwright
- SQL
- Postman
- Amazon EC2
- Amazon S3
- AWS
- Docker
- Kuberrnetes
- CI/CD
- Git
- Linux

SOFT SKILLS

- Good Communication
- Leadership and Teamwork
- Troubleshooting and maintenance
- Decision-making and Analytical thinking

INTERESTS

- Automation Engineering
- Artificial Intelligence
- SDET
- Gain New Technologies

LANGUAGES

- English
- Sinhala

PROJECTS

- **LMS Microservices** — **University Group project**

  Spring boot microservices

  - We developed a scalable Learning Management System using Spring Boot microservices.
  - Technologies used include Spring Boot, Spring Cloud, Spring Security, PostgreSQL, Docker, Kafka, AWS Cognito and GitHub Actions.

  LINK- https://github.com/IsuruUSenarathne/lms-microservices

- **Green Connect** — **University Group project**

  Flutter mobile application

  - Green Connect is a university student portal mobile application developed using Flutter.
  - Technology used include Flutter, dart and firebase.

  LINK- https://github.com/IsuruUSenarathne/green_connect

- **DbVault** — **University Group project**

  Database management system

  - This is a simple database management system developed using python.
  - The technology used includes Flask, Python, MySql, Html and CSS

  LINK- https://github.com/IsuruUSenarathne/DbVault

- **Phoenix Airline** — **University Group project**

  Flight management system

  - Phoenix Airlines is a flight management system developed by Java.
  - The technology used includes Java, Java Servlet, And MySql

  LINK- https://github.com/IsuruUSenarathne/flight-management-system

- **Braille Windows** — **University Group project**

  Braille Printer Desktop Application

  - A system that allows blind people to recognize shapes and letters.
  - Used technology is C#, .NET and MySql

  LINK- https://github.com/IsuruUSenarathne/BrailleWindowsApp
